Zuha Irfan

Software Engineering Student | AI & Machine Learning
@uhairfan08@gmail.com
+92 343 5902786
Rawalpindi, Islamabad, Pakistan

Software Engineering undergraduate with hands-on experience in Artificial Intelligence and Machine Learning, including model training, data preprocessing, NLP, and AI automation. Skilled in Python, PyTorch, predictive modeling, and evaluating machine learning models on real-world datasets. Experienced in building AI-based prediction systems and automation workflows through academic projects and internships. Seeking AI/ML internship and entry-level opportunities to apply practical machine learning skills to real-world problems.

Skills

- **Python**
- **PyTorch**
- **Machine Learning**
- **Natural Language Processing (NLP)**
- **Data Preprocessing**
- **Model Training**
- **Model Evaluation**
- **Predictive Modeling**
- **AI Automation**
- **Prompt Engineering**
- **Git/GitHub**
- **MySQL**

Certifications

Artificial Intelligence Course
Feb 2026 to May 2026
Corvit Institute (NAVTTC)

AI & Automation Internship Certificate
2-Month Internship
GalvanAI

Languages

English

Urdu

Punjabi

Zuha Irfan

Education

APS Humayun, Rawalpindi, Pakistan Matriculation • A1
2019 – 2021

APS Humayun, Rawalpindi, Pakistan Intermediate (Pre-Engineering) • A1
2021 – 2023

Fatima Jinnah Women University
Bachelor of Science in Software Engineering
Rawalpindi • 2023–2027

Experience

DevelopersHub Corporation Rawalpindi
AI & Machine Learning Intern 2 Months

- Trained and evaluated machine learning models using **Python and PyTorch** on real-world datasets.
  Applied **NLP techniques, data preprocessing, and model optimization** to improve model performance.

iBixare Rawalpindi
AI & Automation Analysis Intern 2 Motnhs

Built and optimized AI automation workflows for repetitive processes.

Identified and debugged workflow issues to improve reliability and efficiency.

Projects

Flood Prediction System
Developed a machine learning model to predict **flood risk using environmental datasets**.

Air Quality Prediction System
Real-world **air quality datasets** for machine learning tasks.

Heart Disease Detection System
Developed a database-driven application to assess **heart disease risk from patient data**.
